RELEVANT EXPERIENCE

UX/UI Design Consultant
Dynamo Technologies
September 2021 - Present

At this time I am currently contracted to four projects within the Federal Government, two with USDA, one with The Permitting Council, and the other with USGS. These projects all require a designer to translate customer ideas into front-end UI and developable workflows.

UX/UI Designer - Full Time
Organized Living
May 2020 - November 2020

Being the only UX Designer at Organized Living, I dealt mostly with taking written concepts/ideas and turning them into fully interactive prototypes. I also was responsible for creating rapid mockups for multiple development teams.

UX/UI Designer - Unpaid Contract
PROtect
August 2019 - December 2019

During my time as a college student I had the opportunity to work for the personal safety app startup PROtect. Skills such as Storyboarding, A/B Testing, Usability Testing, Wireframing, and Prototyping were highly prevalent. This was a huge learning opportunity and is what made me pursue a career in UX/UI.

EDUCATION

Miami University, OH
B.S. Emerging Technology in Business and Design
August 2016 - May 2020

Focused my studies on user experience based courses while also taking several development and graphic design courses to round out my skill set.

PRIMARY SKILLS

- Wireframing
- Prototyping
- Accessibility Testing
- A/B Testing
- UX Research
- Developer Collaboration
- Graphic Design
- Agile
- Front End Development

PROGRAMS

- Figma
- Adobe XD
- Adobe Creative Suite
- Sketch
- Invision
- Axure
- Jira
- Microsoft Suite

PORTFOLIO

My portfolio contains work that demonstrates my ability in front-end UX/UI and Web Design.
